Peter Föh, Dipl.Ing.FH
Managing Director MESPAS AG

MESPAS enables a new insight into operations spanning your entire fleet. Benchmarking within your fleet reveals optimization potential hidden to classic management approaches.

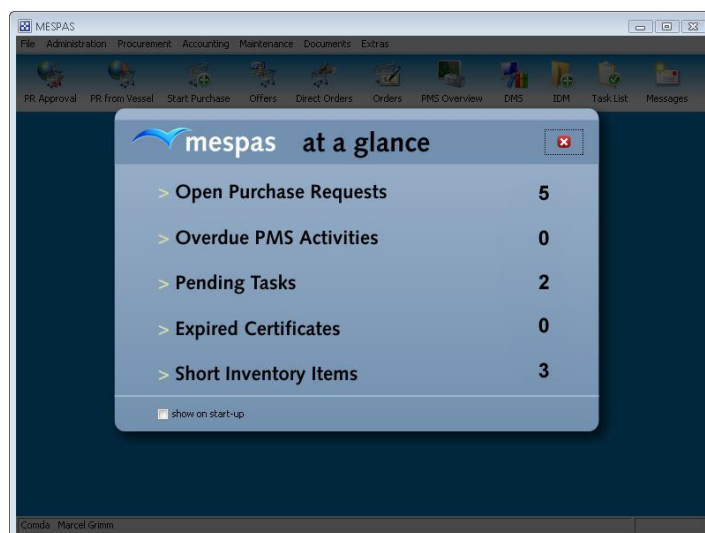

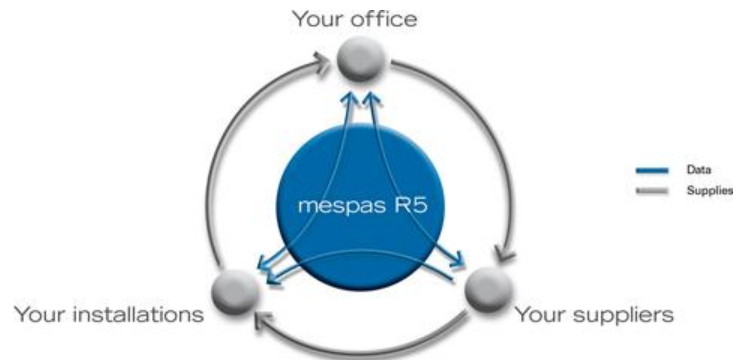

mespas R5 Fleet Management Software

Company and Products

INTEGRATED AND CUSTOMIZED

Your fleet's ships as well as your on-shore offices work with consistent local copies of your business data. Data on vessels is synchronized with your master data stored in MESPAS' central database. **No local backups are needed.**

MESPAS actively supports you in system setup and data acquisition. Software and data updates are **synchronized automatically** throughout your fleet.

Management summary at your fingertips each time you start the program

Manage your fleet, not just your ships...

MESPAS is a Swiss-based software solution and service provider for managing technical installations such as marine fleets and industrial installations.

It was founded in 2000 by marine engineers, software engineers and venture capitalists.
