- Is your head in the cloud yet?
- Customize your vessel sync

Is your head in the cloud yet?

Answer 2 questions to be part of a quick Cloud Computing survey. We're interested in your opinion! In return you will see what others in the industry think. An analysis will follow in our next newsflash. [Link to survey](#)

Customize your vessel sync

Synchronizing data can be so easy! MESPAS monitors the entire sync process and ensures the safe data transfer (very small size data package) between office and vessel. NEW: You can customize the process according to your individual preferences. In doing so, you are free to adjust sync settings for individual... [Read more](#)
