New agent for France: MESPAS appoints ASB Marine Consulting

ASB Marine Consulting and MESPAS have entered into a cooperation agreement. Under this agreement, ASB Marine Consulting will support the sale of the mespas R5 software solution primarily in the French market place. With its broad expertise and market knowledge, ASB Marine Consulting brings a very valuable asset into the joint approach in promoting mespas R5 to companies in both the maritime and oil & gas industry. For further information, please contact gino.fiore@mespas.com.

Noon Report

It has never been easier to fill in and submit noon reports from ship to shore. Captains simply fill in the noon report form which is readily available on the mespas R5 user interface. Upon synchronization, office staff is automatically up-to-date and able to follow and compare the progress of the vessel's voyage, including a variety of customizable technical details and other information.

Online Maintenance Form Catalogue

The brand new MESPAS online Maintenance Form Catalogue provides our existing customers with a complete overview of all MESPAS Maintenance Forms. Furthermore, it allows you to open and study the forms via your browser so that you can select the right forms for your company. For more information, please contact gino.fiore@mespas.com.

10,000th user

Recently, we were able to welcome the 10,000 registered user of mespas R5. Knowing that our software is being used by so many professionals in the industry makes us proud - and serves as an incentive to continue to work hard at delivering a truly innovative and user-friendly software system.
